

Alarm systems for your home

Lower your risk of intruders, breaking and entering and fire emergencies with a security system that's directly connected to Älvsborgs emergency call center.

A safer every day

We want you to feel fully safe at home. With us your home is monitored 24/7, every day and night all year around. By acting fast and correctly we make sure you are safe and sound, even if your house is broken into, during a fire or vandalized. When the alarm is activated you are contacted by one of our operators and if needed a security guard is sent to your home.

About us

Our Alarmcentral (emergency call center) was started during the spring of 2008. For us it felt like a natural step in our wish to provide our customers with safety. We offer systems complete with detecting burglary, fire and safety-situations, ready to be installed in your home, apartment or weekend home. With us you get a system that's easy to use, reliable, decently priced and personally adjusted for your home. The installation by certified personnel is included in the low price you pay for your system. During this installation your entire home is reviewed and the system is personalized to match your needs.

An easy-to-use app to monitor your alarm

Our alarm systems can be supplemented by the app Visonic Go. With it you can easily check your system, turn on or off the alarm and check notifications sent out by the main panel. You can even check the status of each and every product installed in your system. If you have a monitor connected to a camera you can see the images taken if an alarm is activated.

Our security guards

We only work with highly qualified security partners, where one of our most well-known partners is Securitas. As we have customers throughout most of southern Sweden and a large area of the Northern part, it may be a different partner in your area. For us it's important to work with a local partner that knows the area well, to be able to reach your home as fast as possible when needed.

If a security guard is requested to your home he or she will start by doing an external examination of your home. If a burglary or fire is detected, the security guard will alert the authorities. If something has been vandalized, the guard will make protection coverage, for example cover up a broken window. Our emergency call center will keep you updated throughout this whole process if you are not at home.

Our three different home security offers

All of our systems are connected to our emergency call center. Included in your system is of course a full 3 year warranty of your products as well as full and free support. And you do not pay extra if you ever come to need a security guard.

We offer three different deals for home security systems, where the main difference between them is if you choose to have sensor detectors with or without cameras. All systems include a main panel, a wall mounted keypad, an entry sensor, motion sensors, smoke detector

with a built in siren, prox tags, remote control and of course decals for your home to warn the burglar off. The monthly fee is 299 SEK and the fee is the same, even if you choose to complement your system with additional products.

Get in touch!

If you want to order your new alarm system, or just have questions about us and our offers, please don't hesitate to contact us! Call us toll-free at 020-20 79 00 Monday through Thursday 8 am -7 pm (Fridays 8 am - 5 pm). You can also reach our chat at **LFlarmcentral.se** (Click on "Chat" on the bottom right corner). The chat is open during the same hours as our main customer service.

Getting a security system is as easy as 1-2-3!

1. Order your new system via our customers service whenever you are ready
2. Schedule a date for installation by our verified personnel
3. Your new system is ready to go!

Other than getting a reliable, quality security system into your home, most insurance companies offer a discount on your home insurance if you have an active security system. And if you were to have a break-in when you have an active system with us, we will cover your excess (up to 1500 SEK).
